

CHEMCLAD SC Provides Significant Performance Improvements Over Powder Coating on US Navy Aircraft Carrier Watertight Doors

Powder coated doors after a few months at sea.

Same door protected with CHEMCLAD SC

CHEMCLAD SC advantages...

- ▶ No special tools are required – just a roller & paint brush.
- ▶ No odors & no health or environmental risks.
- ▶ Superior adhesion to the steel prevents under-film corrosion (rust creep).
- ▶ Any physical damage to the CHEMCLAD system remains isolated and can be easily repaired in the field by ship's force – not possible with powder coating.
