

Family Fitness Center Uses ENEFLOW & WATER BUDDY to Solve Hard Water Problems

A family fitness center located in PA was confronted with a variety of problems caused by hard water. After consulting the local ENECON Field Engineering Specialist, they decided to treat these problems with ENEFLOW Fluid Dynamic Power Cells.

ENEFLOW 5000's were installed on the main incoming water lines and WATER BUDDY units on lines feeding specific problem areas in an attempt to alleviate these scaling issues.

The owner of the club has been very pleased with the results, and he has reported multiple benefits, including:

- Reduction of scale build-up on showers, faucets, steam room fixtures, etc.
- Less chlorine required for the pool and spa.
- Washing machines require less detergent.

According to the owner, *"ENEFLOW was one of the best investments I have made in the past few years"*.

The time and money they will save dealing with chronic hard water problems will be well worth the investment made in the ENEFLOW and WATER BUDDY units.
