

Northern Italian Condominium Complex Protects Roof With ENESEAL HR

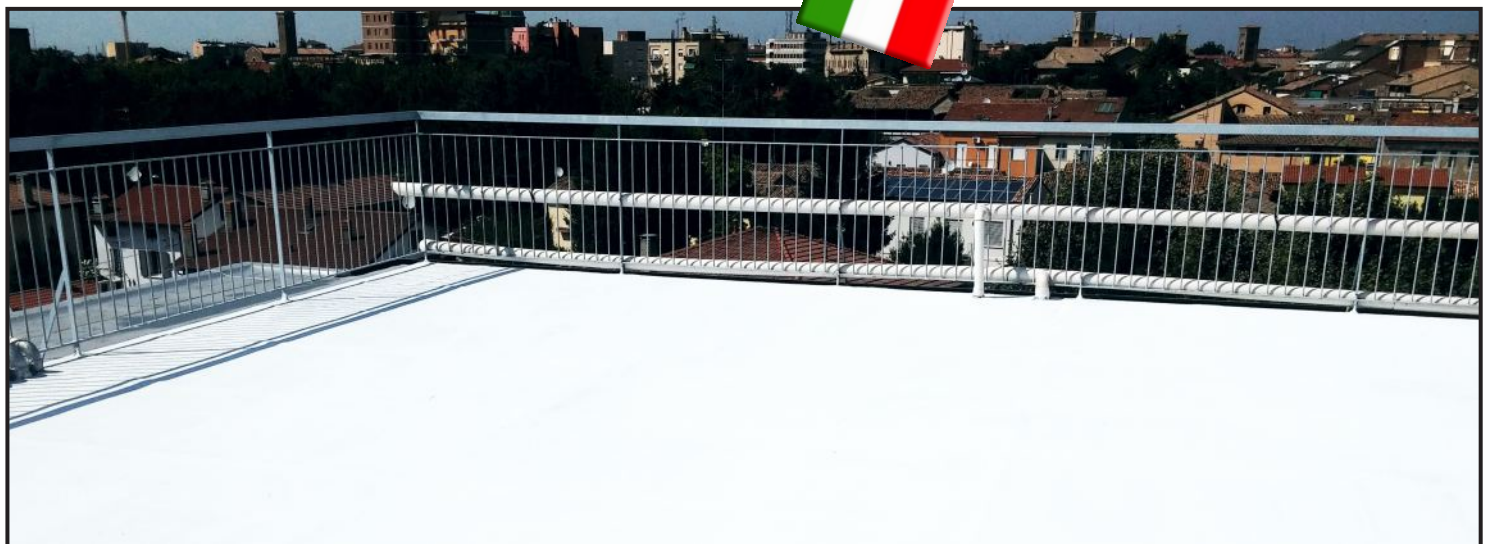

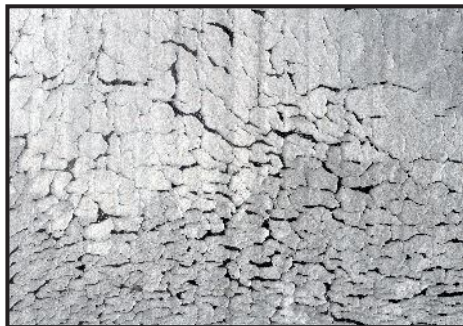

The conventional tar paper and aluminum coated roof of this condominium complex in northern Italy needed to be resurfaced. The government enacted regulations on aluminum coated roofs near airports due to reflectiveness and their effect on the planes passing overhead. The aluminum coating was also failing in many areas.

building and he was able to provide a fast and cost effective solution.

The roof was cleaned with a floor scrubber and commercial detergent. Two coats of ENESEAL HR were applied satisfying regulations as well as providing heat refractive properties to the building.

This 5,000 sq ft roof coating project cost approximately \$11,500.

Coincidentally, the president of ENECON Italia lives in the
