

## ENESEAL CR Stops Gantry Corrosion At Power Substation In Nepal

This pair of electrical substations is part of Nepal's only reservoir type hydroelectric power station. After 30+ years in service there was a sizeable amount of corrosion on the substations' gantries.

The power station's engineers needed a cost effective and reliable corrosion solution. They turned to the local ENECON distributor for help. The substation gantries were manually prepared then coated with ENESEAL CR. In all, approximately 1,900 square meters were protected at both substations.
