

## Scenic Train Company In Canada Successfully Applies ENESEAL CR To Train Roofs

An historic, luxury, scenic train company in Canada was looking for a product to apply to the roofs of their train cars while performing restoration maintenance.

The local ENECON Distributor in Alberta was contacted and recommended a custom black tinted ENESEAL CR. This was the perfect

solution as the maintenance managers did not want to do any abrasive blast to the exterior of the train cars.

After the successful application to the train car roofs, the ENECON Distributor was asked to apply safety yellow stripes on the floor of the train depot.
