

ENECON Ontario Hosts Successful Customer Event

In early June, 2008, ENECON Ontario hosted a customer event at the Peninsula Ridge Estates Winery.

With about 20 people in attendance, discussions focused on the latest advances in polymer composites technology and application techniques to repair/protect all types of machinery, equipment & structures damaged by

erosion, corrosion, impact/wear, damage on floors and concrete, chemical attack, hydrostatic pressure, roof leaks as well as energy conservation & safety surfacing/non-slip issues.

Everyone agreed that this was an extraordinarily productive and informative seminar.
