

ENECON Northeast's New Corporate Headquarters in Farmingdale, NY

ENECON Northeast APS announces the opening of its new corporate headquarters in Farmingdale, NY.

Their new facility offers expanded executive offices, a conference center and a "project services" workshop to provide better training for Field Consultants, Application Technicians and customers.

The warehouse area has been expanded to include the "project services" department and space for increased inventory of all ENECON High Performance Polymer Systems.

Mike Barr, Project Manager, feels that the new facility will allow ENECON Northeast to offer an improved level of service to both their Field Consultants and their customers.

They are now able to accomplish in-house preparation and application projects on equipment such as pumps, valves, pedestals and other transportable components.

"This is major milestone for ENECON Northeast and would have not been possible without the efforts of our field application crew led by Tom Whittaker, Senior Sales Managers, John Huber, Craig Cowan, Mike Barr, Sales Associates and office personnel led by Jenny Lawrence, and of course the continued support and guidance from Bill Woods, our VP of Engineering."

Robert Barr, President.
