

## CHEMCLAD & ENECRETE Protect Containment Area from Chemical Attack

**Client:**  
Power Plant

**Location:**  
Chile

**Problem:**  
Concrete containment area was suffering from chemical attack and corrosion after prolonged exposure to oil and fuel spillage.

**Solution:**  
After removing contaminated concrete and thoroughly cleaning, **ENECRETE DuraQuartz** was used to repair the concrete walls.

**CHEMCLAD SC** was then used to protect the concrete from future corrosion.

**Coverage Area:**  
55 m<sup>2</sup> / 592 ft<sup>2</sup>

**Cost:**  
\$8,000 (\$5,000 in ENECON products & \$3,000 in labor).
