

International Corrugated Paper Manufacturer Repairs & Protects Concrete Floors with ENECRETE, ENECLAD & CHEMCLAD

This international corrugated paper manufacturer located in Romania had warehouse floors in need of repair. The floors were cracked in many areas and in some areas large holes had created safety hazards for employees. ENECON Romania was contacted to help provide a long lasting, cost effective solution.

After the floor was cleaned by pressure washing, all of the cracks and holes were repaired with ENECRETE DuraQuartz. The floor was then primed with a coat of CHEMCLAD P4C. Two coats of ENECLAD FPS were then applied. ENECLAD FPS is extremely abrasion resistant, making it ideal for heavy traffic areas in warehouses and loading docks.

Finally, the edges were striped out with CHEMCLAD SC in safety yellow.
