

ENESEAL CR Protects Indian Manufacturing Plant Trolleys from Corrosion

This manufacturing plant uses 250+ trolleys to transport semi-finished goods from one area to another. They are usually kept outside in often harsh weather conditions. Corrosion is a major concern, therefore.

The local ENECON Distributor in Uttar Pradesh suggested using ENESEAL CR to protect these trolleys.

After hand grinding & wire brushing 10 'test' trolleys to remove the loose rust and old paint, one coat of a commercially available rust converter was applied, followed by two coats of ENESEAL CR.

The client is very happy with the results and plans on protecting the balance of the trolleys with ENESEAL CR yellow.
