

Kuwait's Ministry of Electricity & Water Salvages Main Circulation Pump With METALCLAD CeramAlloy.

ENECON's Distributors in Kuwait, submitted these impressive series of photographs detailing a complete repair and resurfacing project of a main circulation

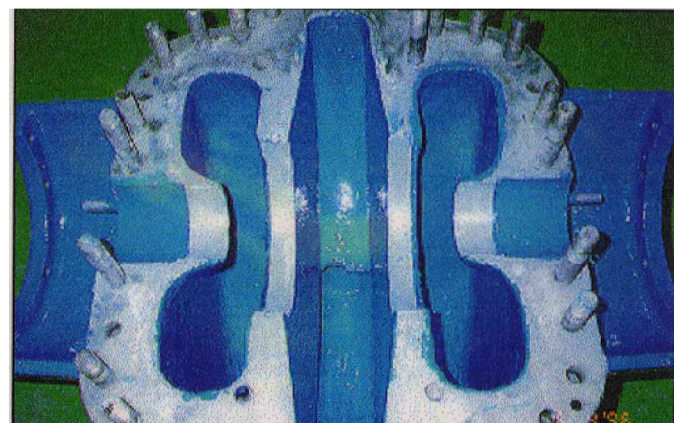

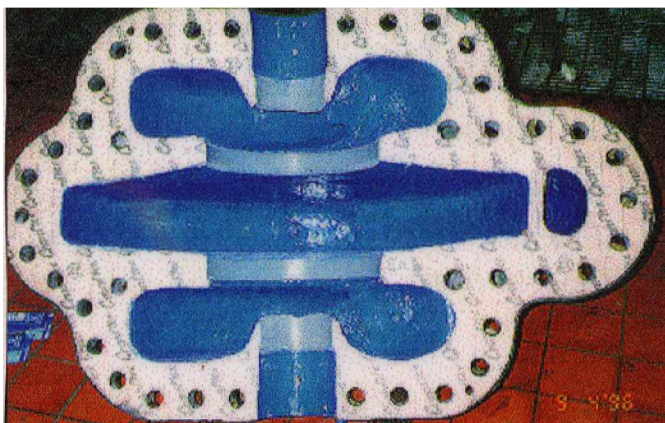

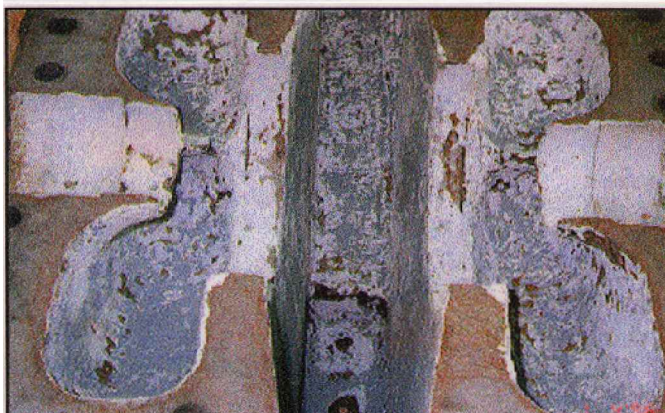

pump with METALCLAD CeramAlloy.

The **Kuwait Ministry of Electricity & Water** are very impressed with the exceptional erosion and corrosion

resistance of the CeramAlloy CP+ & CL+. They were equally impressed with the "professionalism" demonstrated by Kuwait's ENECON Engineering Team

who supervised the entire application

The ring seat and bearing areas were rebuilt without machining and all wet areas were protected with CeramAlloy CL+.
